Profile Summary

Third-year IT Software Engineering undergraduate at **SLIIT** experience in full-stack web application development. Experienced in building scalable and maintainable applications using **MERN** Stack, React.JS, Next.js, **ASP.NET Core** and **Spring Boot**. Strong background in developing RESTful APIs, implementing CRUD Operations, and working with SQL-based databases including MySQL, PostgreSQL and Super Base.

Familiar with Agile / Scrum methodologies, version control using Git, and collaborative development environments. Passionate about learning new technologies contributing effectively.

Education

Bachelor of Science - BSc. (Hons) in Information Technology | Specialized in Software engineering Sri Lanka institute of Information Technology (SLIIT)

11/2023 - Present | Malabe

- My degree program has equipped me with designing, creating, and maintaining software by applying technologies and practices from computer science, project management, engineering, application domains, interface design, digital assets management, and other fields.

GCE Advanced Level | Engineering technology stream

2023 | Athurugiriya Mahamathya Vidyalaya

- Passed G.C.E. (A/L) Examination in Engineering Technology Stream with three 'S' grades.

Additional Qualifications

- Diploma in information Technology(done up to final exam) : ESOF Metro Campus
- Certificate Course in English : Guide Way Institute
- Master React.js 15 from Basics to Advanced, ReactJS, and Tailwind CSS – SimplyLearn (Online Certification)
- Web Design for Beginners , Python for Beginners - Open Learning Platform(UOM)

Projects

- **Laboratory Management System (recently used)** : smart laboratory management platform designed to streamline sample tracking, testing workflows, and report generations with QR scanning
Full-Stack project | MERN | Vercel | GSAP | Tailwind CSS | Bootstrap | MVC architecture |JWT
 - A platform for Lab Technicians , Lab Managers / Administrators to manage all lab related workflows with effectively.
 - The system features QR code generation and mobile-based QR scanning, along with comprehensive sample management supported by full CRUD operations.
 - This project currently used in a local company(Demo).
 - Clean and intuitive user interface designed for efficient laboratory workflow management.

- **STUDLY -Learning Management System (MERN STACK)-** :
Developed a scalable full-stack LMS using **MongoDB**, Express.js, React.js, and Node.js (MERN). Implemented secure **JWT** authentication, media management with **Cloudinary**, database services with **Supabase**, and deployed the application on **Vercel**. Focused on performance, security, and a seamless learning experience for students and instructors.
Full Stack Project | Deployed Vercel | JWT | SUPABASE | CLOUDINARY | Layered Architecture | GITHUB

- **Medicare Lanka – JAVA SpringBoot Microservices project for a HealthCare System** – : Developed a full-stack healthcare management system using **Spring Boot**, **React.js**, and **PostgreSQL (Neon DB)**. Implemented secure **JWT** authentication, Spring Security, **RESTful APIs**, and responsive frontend interfaces. Focused on scalability, performance, and secure management of healthcare data, appointments, and patient records.
DOCKER | KUBERNETS | SPRINGBOOT | REACT JS | POSTGRE SQL | NEON DB | MICROSERVICES ARCHITECTURE
 - Secure Doctor and Patient Authentication using JWT and Spring Security
 - Doctor Dashboard for managing appointments, patient records, and consultations
 - Online Appointment Booking and Scheduling System
 - Telemedicine Platform with Real-Time Video Consultations between doctors and patients
 - AI-Powered Health Assistant for answering health-related queries and providing general medical information
 - Patient Profile and Medical History Management
 - Secure RESTful API Architecture with role-based access control
 - Responsive and User-Friendly Interface built with React.js
 - PostgreSQL Database Management using Neon D

- **Travel Safe web application** : full stack web application for travelers to check travel risk level of each country and the recommendation.

Full-Stack project | MERN | Mongo DB | framer motion | Restful API | MVC architecture | Docker

- Provides country-wise travel risk levels, weather conditions, and disaster severity analysis with real-time data updates.
- Includes interactive visualizations and smart travel recommendations to help users make safer and more informed travel decisions.

- **Nancee.lk full stack e-commerce system** : full stack E-commerce platform developed for a local product selling company.

Full-Stack project | MERN | Restful API | Tailwind CSS | Cloudinary | MVC architecture | Docker

- Nancee is a full-stack MERN e-commerce platform for seamless product browsing, purchasing, and order management, enhanced with GSAP-powered interactive UI animations with role based authentication.

- **Eventra : Java full stack event management system** : second year university project for a event management company.

Full-Stack project | JAVA | XML | CSS | GITHUB | MVC architecture | JIRA | mySQL

- Developed a event management system for managing all event tasks. CRUD operations , user management and event management with all core functionalities using MVC architecture

- **Pulse Mate : Kotlin Android mobile App** : A modern Android habit tracking application developed using Kotlin, designed to help users build and maintain healthy daily routines. The app focuses on improving lifestyle habits through simple tracking tools, intuitive UI, and personalized daily goals.

Key Features:

- Daily habit tracking for walking, water intake, and sleep schedule
- Smart reminders to maintain consistency in daily routines
- Emoji-based mood and habit tracking for quick user feedback
- Progress visualization to monitor improvement over time
- Clean and user-friendly mobile interface built for Android devices
- Lightweight and optimized performance for smooth daily usage

- **Task Shedule Next js application** : a simple web application for schedule daily tasks , prioritize tasks.
FRONT-END | NEXT JS | Tailwind CSS | GITHUB | GSAP
- **DotWork (developing)** : Full- stack real time platform for sharing work-life experience with each other
Full-Stack project | MERN | Thress JS |tailwind CSS | GSAP | Clean architecture | JWT |Cloudinary | Docker | CI/CD
 - A real-time platform for users to allow sharing their work-life experiences with each other like linkedin platoform.
 - Using JWT , GSAP and Three JS to enhanced the user experience and Cloudinary for handling files realtime including responsive modern UI.

Technical Skills

Programming Languages

TypeScript | JavaScript | Java | C | C# | Python

Frontend Development

React.js | Next.js | Vue.js | Tailwind CSS | Bootstrap | HTML5 | CSS3 | GSAP | Redux | Web Workers | Zustund

Backend Development

Spring Boot | ASP.NET Core (Practicing) | Node.js | Express.js | PHP (Laravel) | RESTful APIs

Databases

MySQL | PostgreSQL | MongoDB | Supabase | Neon DB | PGAdmin

DevOps & Tools

Docker | Git & GitHub | Linux | CI/CD Pipelines | Kubernetes | Github Actions

Software Architecture

Microservices Architecture | Clean Architecture | RESTful System Design | NGINX

Testing & QA

Manual Testing | Functional Testing | Test Case Design | Bug Reporting | SDLC Understanding

Development & Collaboration Tools

Jira | Trello | Postman | Swagger

Volunteer

Member of LEO club ,SLIIT – involved in community service, leadership-building projects and youth empowerment projects.

Soft Skills

Critical Thinking | Agile Adaptability | Version Control Proficiency | Data-Driven Decision Making.
